My name is Maureen Diver and I am an organic farmer and concerned community member living in Dandaragan.

I find the threat of fracking in our area leaves me very concerned for a future in farming. Without clean water soil and air then farming as we know it is lost.

Our area has been earmarked as a food bowl

region. We need to be left alone to get on with our job as primary producers. From invasion of privacy to potentially destroyed farmland it's a no brainer!

No regulation is going to stop pipes corroding and seals not sealing properly. It's the nature of the materials used to break down. If there is any risk and it doesn't matter how low it's termed then it cannot be allowed.

Water knows no boundaries.

Dr Tony Ingrassia is my main source of reference for education and information on this. We have a duty to listen to our 'Father' and take heed.

We owe it to ourselves as a species to ban this practice. As a mother of 3 young children the only future is a Frack Free Future.

Yours sincerely

Maureen Diver
