

Noonkanbah 19/2/18

Dear Mr Hatton.

My name is Benjamin Laurel. I am a Warlangurru man. I work at Milligiddee Station Cattle Company (MSCC), but can't be there now as its too wet this time of year so I stay in Noonkanbah until end of the wet.

I have been working and having meetings with Buru people for about 5 years or so now.

If the gas project goes ahead its really good for jobs, we need to get our young people working and training. Ever since they been around, Buru have been checking for the safety of the country. Some of our young boys like Micheal Costaine and Morrison Wulgarri check the water with samples with them out there at the wells and we know its ok. I want many more young people involved working with them.

I look forward to meeting you and hope we can train of our people to work with Buru and Mitsubishi in the future.

Benjamin Laurel
