To whom it may concern....Which is EVERYONE,

Am writing as a caring Australian citizen who lives in Perth, cares for our country, & indeed our planet.

My greatest concern is WATER.

We are one of the world's driest continents, & to mess with our water supply is to mess with our life. Your life. Everyone's life.

It is un-natural to pump chemicals into the ground.

It is NOT 100% safe, and is NOT worth the risk.

Listen to the Texans.....

Listen to the Queenslanders.....

Similar sickness's and symptoms with adults, children, not to mention the grazing animals.....

We need safe water for the cows, sheep, pigs, & whatever animals you eat = FOOD

We need safe water to irrigate our crops = FOOD

We need safe water to DRINK

....To bath in...

To cook in....

Water that ignites, in rivers and from household taps, is a bizarre demonstration of the foolhardiness and folly of the whole crazy idea.

Can we live without gas? YES

Can we live without water? NO

Once those chemicals are forced into the ground, **there is no turning back,**
Once the damage is done, **it is too late.....**

Who checks the safety standards that are set? Even then, when they find something wrong it will be too late.....

We have been taking out the good since the Industrial revolution.

And only replacing it with bad.

Polluting the ground,

Polluting the oceans,

Polluting the air.....

THIS IS NOT SUSTAINABLE !

We need people who are in this critically responsible decision making position, to ***think beyond their own term of office .***

Think of YOUR children, and THEIR children.....WHAT WILL THIS DO TO THEM!?

Life is NOT all about money. It is NOT all about making a killing to top up the coffers and be in surplus

It is about life.....

And there won't be any if we're all sick.....

Please do all you can to STOP FRACKING. In WA. In our pristine Kimberley.
Everywhere!

Thank you.
Where there's life there's hope.....

P. Massey,
Cloverdale, WA
