

Hello Mr Hatton.

I worked on the Buru wells doing security and assisting the seismic crew. I was there from the start and also worked a little while at the end. It was a good experience for me.

I really enjoyed the work with the Condor mob, they were good fellas. The dongers were good too and so was the food.

I want the project to go ahead and my dream is that Mitsubishi can one day buy us Calwynardah Station. We can then run it and manage it. Us people. That would be good.

Their dream is to get the gas project going, that's ok. We can work with them and run and manage our own country too.
