To whom it may concern,

I wish to express my concern over the use of fracking in WA.

This seems to be a bit of a gamble when it comes to successful extraction of gas via this method and I cannot understand why, even with a very small risk (or potentially a large risk), our drinking water would ever be risked by any form of mining.

SureLY we can find other methods to obtain gas or use other forms of energy?

I ask that a total ban be placed on any fracking in WA.

Your sincerely
Clare Wall
