---

Good afternoon,

Regarding the fracking of our landscape here in Western Australia, I strongly oppose any form of fracking in the state of Western Australia or any state for that matter. Under no circumstances have any politician in government or any other corporate body have any rights to degradate the pristine lands we live on that damages our health in any way shape and form. We THE PEOPLE must be taken notice of with respect to caring for all lands that belong to everyone to enjoy, NOT for the rich few to destroy it for pure greed.

The Commonwealth of Australia Constitution Act 1900UK has been TOTALLY ignored by politicians pandering for corporate gain and control over "We The People" who carry the power over them.

The government structure has turned itself into a private corporate body being criminally liable under the Constitution. All politicians and corporate bosses are criminally liable for the insane damage they've been causing on our lands we live on and making us sick!

Time to stop this utter madness NOW!

Linda Wood
